Greenways Launches New

(Continued From Page No: 13)
true that we as parents aren't even aware of the exact requirement of these nutrients in our children's diet. A child needs the correct amount of quality nutrition for its total development. Ideally, every growing child should obtain proteins from the diet. But our supposedly "modern" and deviously unhealthy food habits prevent the sufficient intake of the much needed proteins. The impact is especially deeply felt during the growing years of our lives. It's true. Our diets do lack adequate quantities of nutrients (proteins being one of the greatly ignored ones!). Often, it could be our vegetarian diets that lack the needed amount of proteins. Hence, the need for a protein supplement".

Asserting that Nutra Junior is a high value protein powder with high nutrition values, which allows a child to grow better, the Company stated that Proteins, Carbohydrates, Lipids, Vitamins, Minerals and fluids are essential to keep good health. Especially, for the right growth and development of children, a diet that has the perfect balance of these nutritional ingredients is indispensable. High-quality nutrition readily translates into good health and gives fewer chances to diseases to wreck havoc with the body. Children that are supplied a balanced diet have great immunity and thus

Neo Magnetic Bracelets

grow better and learn better. It becomes needless to say that any kind of an imbalance in the nutritional qualities in the diet will cause diseases in the child.

Nutra Junior Protein Powder is specifically designed to provide quality proteins to children. It contains a blend of super quality proteins from different sources such as Soy Protein Isolate, Whey protein concentrate and Skimmed milk powder to combine the individual advantages of all these superior and varied protein sources. The best thing about Nutra Junior Protein Powder is that it does not limit itself to providing proteins. It is also a superb supply of various other essential nutrients. It has 'quick energy' carbohydrates, derived from Maltodextrin. It also has the essential fatty acid Docosahexaenoic acid (DHA) derived from vegetarian sources. It contains vitamins A, B complex, C and D and minerals like

Calcium, Iron, Phosphorus and Selenium and provides colostrums (also known as 'first milk') harvested from dairy animals. It is basically the breast milk produced after the birth of newborn and lasts for 2-4 days. It also packs in biologically useful ingredients like Astaxanthin, Ashwagandha, Brahmi and dietary fibers. Additionally, Nutra Junior Protein Powder contains Vitamins (A, B-complex, C and D) and minerals (calcium, phosphorous, selenium and iron). These vitamins and minerals are required for the normal growth of bones and muscles and also for the proper development of all the bodily systems. So it (partially) takes care of probable deficiencies of these ingredients, possible in children exposed to dietary habits associated with 'modern' life style, the Company informed.

Greenways Healthcare Pvt. Ltd., are the manufacturers of 'Magno', a proven health and dietary supplement for adults. The product is very much regarded by the consumers as one of the best supplement. The Company had been marketing its products through network marketing with a good compensation plan. The manufacturing unit of the Company is located at Pune in Maharashtra.
